

HEALTH & SAFETY POLICY

Central Wire is committed to preventing occupational illness and injury in the workplace and providing a safe harassment free environment for all employees, visitors and customers.

In meeting that commitment, we have developed and implemented operating practices and policies that safeguard all employees through accident prevention and awareness training.

The achievement of our health and safety goals demands commitment, active support and involvement of employees at every level. Accountability for the health and safety program rests with management, however all employees share responsibility in health & safety. It requires strict adherence to all established safety rules, instructions and the obligation to be alert for and to report any potentially detrimental conditions.

All Supervisors have the responsibility to ensure that safe and healthful work conditions are maintained in his/her assigned work area, which includes visitors and contractors.

All employees will perform their jobs safely in accordance with legislative requirements and our Safe Operating Procedures/Practices.

Central Wire is dedicated to continuous improvement in accident prevention and maintaining a safe and harassment free environment, a goal that can only be achieved when all employees are actively committed, supportive of and involved in the health and safety program.
