## Central Wire Can Manufacture:

- Wire coil from .040" up to 1.000" (1.02 mm to 25.4 mm) with suitable metallic and nonmetallic coatings
- Bar stock centerless ground up to .750" (19.05 mm)

Material is produced and packaged according to customer specifications. Unless otherwise specified, each coil of aerospace quality wire is paper wrapped for better protection.

## Stainless Alloys

302/304, 304HQ, 303, 305, 310,  
314, 316, 317, 321, 330, 347,  
20CB, 410, 416, 420, 430, 431,  
440C, 204CU, A286, 13-8MO, 17-  
PH, 2205, 15-7MO

## Nickel Alloys

400, K500, 600, 601, 625, 718,  
X750, 800, 805, 825, 276, MP35N

**Precoat Only:**  
 Annealed  
 Ready for heading  
 or skinpass  
 Simple parts

**Copper Moly:**  
 Skinpassed  
 Ready for heading directly  
 Highest performance coating  
 available for the most difficult  
 engineered fasteners.

**Moly Supercoat:**  
 Annealed  
 Ready for heading  
 or skinpass  
 Molybdenum acts as lubricant

**Copper Grease:**  
 Annealed  
 Ready for heading  
 or skinpass  
 Copper acts as a lubricant.

**Grease:**  
 Skinpassed  
 Ready for heading directly  
 Light duty forming

**Techcote™ - Soap:**  
 Skinpassed  
 Ready for heading directly  
 Light-duty forming for  
 relatively simple parts.

**Moly Techcote™:**  
 Skinpassed  
 Ready for heading directly  
 Available light or heavy moly  
 Soap coating enriched with  
 molybdenum disulfide for extra  
 protection during forming.

**Copper Techcote™:**  
 Skinpassed  
 Ready for heading directly  
 More difficult parts requiring  
 high performance lubrication  
 but with light residual for  
 anti-packing, low dusting.

**Copper Precoat:**  
 Annealed  
 Ready for heading  
 or skinpass  
 Copper acts as lubricant  
 for moderately severe forming.
